THE FIRM

Pediatric MedLegal Partners (PMLP) is a physician-founded and physician-led consulting firm built to help attorneys navigate the clinical complexity of serious matters involving children.

Children are not simply small adults. Their physiology, development, and long-term medical needs are fundamentally different from adult patients - and so are the questions that arise in litigation. PMLP was founded to close that gap through pediatric-specific clinical judgment, structured expert coordination, and physician-led review when the pediatric context changes how the matter should be assessed.

WHY PEDIATRIC SPECIFICITY MATTERS

Distinct Physiology

Pediatric anatomy, pharmacology, and physiologic responses differ materially from adults, especially in perioperative, critical care, and emergency settings.

Long Time Horizons

Injuries to children can compound over decades. Future medical needs and life care cost projections require pediatric-specific reasoning.

Subspecialty Precision

Matching the right pediatric subspecialist to the right clinical question requires physician-level understanding of the field and its boundaries.

SERVICES

Expert-witness review and coordination

Physician-led identification and coordination of qualified pediatric medical experts for independent case review, record analysis, and potential testimony.

Life care planning coordination

Coordination of pediatric-aligned life care planning support, including future therapeutic needs, developmental considerations, long-term care projections, and subspecialty cost inputs.

Future medical needs + rebuttal review

Review of long-term pediatric medical needs, future care scope, clinical reasonableness, opposing assumptions, and multidisciplinary pediatric review when needed.

FOUNDING PHYSICIANS + HOW PMLP WORKS

Adam Broussard, MD

Co-Founder - Pediatric Anesthesiology

- Dual board-certified in Anesthesiology and Pediatric Anesthesiology - FASA.
- Fellowship-trained pediatric anesthesiologist; pediatric anesthesiologist at Children's Hospital New Orleans.
- Prior academic roles at LSU Health, Tulane, and the University of Oklahoma.
- Relevant focus: pediatric perioperative care, airway management, pain management, and anesthetic risk in medically complex children.

Ayush Gupta, MD

Co-Founder - Pediatric Emergency Medicine

- Dual board-certified in Pediatrics and Pediatric Emergency Medicine.
- Fellowship-trained pediatric emergency medicine physician.
- Focus includes delayed diagnosis, emergency triage and trauma, sepsis, resuscitation, acute pediatric illness, and non-accidental trauma.
- Relevant perspective for acute care liability, emergency standard of care, injury mechanism review, and future-care questions after significant pediatric events.

HOW PMLP WORKS

01 General inquiry

Counsel contacts PMLP with a non-confidential description of the matter and the clinical questions involved.

02 Introductory conversation

PMLP reviews the inquiry and schedules a brief conversation to assess fit, timing, and scope.

03 Engagement

If the matter is a fit, PMLP executes an engagement letter and moves the matter to an approved secure off-website channel for confidential

04 Clinical review

PMLP reviews the clinical record, identifies the appropriate pediatric specialty lens, and either provides physician consultation or

05 Ongoing support

consultation or expert review.

Depending on the matter, support may include expert review, life care
